Integrate Workspace Productivity Connector with Aras Innovator to streamline your Product Data Management process

In today's fast-paced product development environment, companies need to efficiently manage a large amount of documentation across different stages of the product lifecycle. From initial design concepts to manufacturing and post-launch support, seamless collaboration and data accuracy are essential to product success. A powerful way to enhance these capabilities is to integrate Google Workspace with PLM systems.

Why integrate?

Enhanced collaboration & communication

Google Workspace allows multiple users to collaborate in real time, making it easier for cross-functional teams (engineering, design, marketing, etc.) to work together on product-related documentation. With an integration, automatic synchronization of changes are possible, minimizing errors due to outdated information.

Centralized data repository

A key benefit of an integration is that all product-related documentation–from requirements to test plans–are stored in a central location, ensuring accessibility and reducing information silos. The PLM system provides version control and traceability to ensure that the correct document versions are used throughout the product lifecycle.

Streamlined workflows & automation

By automating workflows such as approvals, notifications and document linking, an integration streamlines the whole product documentation process and ensures compliance with company standards.

The solution

Integrating Google Workspace with Innovator using XPLM's **integration technology** is a strategic move that can transform documentation and lifecycle management. By enhancing collaboration, improving data management, accelerating time-to-market, and ensuring compliance, this integration offers substantial benefits.

As companies strive to stay competitive in a dynamic market, leveraging cloud-based tools like Google Workspace within Innovator provides a strategic advantage.

EFFICIENCY	CONSISTENCY	COMPLIANCE
■ Always access up-to-date information ■ Perform agile, cross-domain development	■ Grant constantly high data quality ■ Minimize risk of errors	■ Retain compliance and standards ■ Ensure auditable processes

Integration features

The integration of Google Workspace achieves complete traceability of your product related documents by integrating them into your business processes managed by Innovator.

FEATURE	FUNCTIONALITY	YOUR BENEFITS
Seamless linking to Innovator	Link documents "in work" like change descriptions directly to Innovator.	Attach product-related documents such as handbooks to relevant Innovator objects.
Automated PDF generation	Auto-generate PDFs during save operations to Innovator.	Use PDFs for viewing, redlining, and collaboration with suppliers or customers.
Direct navigation between systems	Open documents in Google Drive directly from Innovator with a single click.	Jump to related Innovator objects from Google documents for enhanced traceability.
Lifecycle management	Control document access through lifecycle tracking.	Reopen documents for editing when new revisions are initiated in Innovator.
Google Workspace support	Manage and integrate Google Docs, Google Sheets, and Google Slides with Innovator.	Work within familiar tools while leveraging powerful Innovator functionalities.
Collaborative editing & workflow	Enable collaborative editing and saving in Google Drive while maintaining full integration with Innovator.	Apply document workflows and release processes from Innovator seamlessly.

Transform your documentation and lifecycle management with XPLM's Google Workspace-Innovator integration!
